Duplicated Consumer Count and Annual Expenditures by Service Type (FY2006 SYBASE used)

This duplicative count is based on the SYBASE FY06 download and represents the number of individuals that received a payment for a particular service type. Please note that the same individual is counted for each service type they received (duplicative). For details on which payment codes were included in each service type grouping, please see chart details relating to each service type grouping. Total expenditures represent the total payments made, in millions, for the service codes listed in each service type grouping.
